How to use your personal Gmail account in project Clarify?

- Create or log into a personal Gmail account (school/work accounts may not support app passwords)
- Go to Manage your Google Account > Security & sign-in
- Enable 2-Step Verification
- Visit <https://myaccount.google.com/apppasswords>
- Enter an app name (e.g. "Clarify") and click Create
- Copy the 16-character password shown
- Paste it into your `.env` file as:

`EMAIL_HOST_PASSWORD=xxxx xxxx xxxx xxxx`

`EMAIL_HOST_USER=YOUR-GMAIL@gmail.com`

`DEFAULT_FROM_EMAIL=YOUR-GMAIL@gmail.com`
